

Region 3 Radon Stakeholder Meeting Agenda –draft
Monday, June 1, 2015

Hosted by Conference of Radiation Control Program Directors
Best Western Plus Hotel & Conference Center, 5625 O'Donnell Street
Baltimore, MD 21224

Time	Session
7:30 – 8:00	<i>REGISTRATION</i>
8:00-12:00	<p>CE Course #1: Application of the AARST MAMF Multifamily Radon Measurement Protocols to HUD/FHA Property Transactions. Instructor: Shawn Price (Shawn Price and Associates)</p> <p>Course Description: This course will cover the basic testing protocols and goes beyond the standard in terms of emphasizing proper project planning, management, troubleshooting, reporting, and recommendations. It is commonplace that the certified testers are being asked to cut corners and test as few locations as possible and the radon professional needs to know how to anticipate these problems and be prepared to respond to them in a professional manner. Consultants are often eager to pass the liability down to the subcontractors and in this case, the radon professional is the one with the knowledge, experience, and credentials and should be in a position of authority when it comes to the radon portion of the project. This course prepares the students in areas such as business and limiting their liabilities, which is beyond the scope of the standard.</p> <p>Course has been approved by both NRSB and NRPP for 4 Category I credits</p>
12:00-1:00	<i>Lunch on Your own</i>
1:00-5:00	<p>CE Course #2: Radon and the Real Estate Professional Instructors: Dr. Paul A. Locke (JD, Dr PH) and Dr. Paul N. Houle (Ph.D.)</p> <p>Course Description: The purpose of this course is to aid radon testers and mitigators in their interactions with real estate agents, brokers and clients. It will cover the motivations of clients, realtors and agents, some public and realtor perceptions of the radon problem, and how best to interact with these individuals. This course will be somewhat interactive with role playing in several issues. Those taking this course should gain some 'tools' in improving those interactions and a better understanding of real estate law, radon epidemiology and science, and radon testing mitigation and new construction basics as it applies to real estate professionals.</p> <p>Course has been approved by both NRSB and NRPP for 4 Category I credits</p>
5:00-5:10	<i>Housekeeping</i>

A big thanks to Vendor #1 (AM) and Vendor #2 (PM) for sponsoring today's breaks!

Region 3 Radon Stakeholder Meeting Agenda –draft

Tuesday, June 2, 2015
