

# TIPS for a GOOD POSTER

- A good poster will make people **STOP, READ, REMEMBER and TAKE ACTION**.
- Read the rules/guidelines carefully and follow the directions.
- Be sure that the information that you put on the poster is correct.
- Do some research about Radon. Go to [Radon.Utah.Gov](http://Radon.Utah.Gov) to learn more about what radon is and where it comes from.
- Posters can be created with crayon, colored pencils, markers, paint, collage, photographs, or computer graphics.
  - If you use photographs be sure that they are focused and appropriate photographs (makes it easier to recognize)
  - When using computer graphics, do not use copyrighted logos (will be eliminated)
- Think of your poster as a billboard advertisement on this topic.
- **THINK & BE CREATIVE**. Come up with a catchy idea or ideas.
- Start out by drawing or sketching your idea or ideas onto a regular piece of paper.
- Ask adults to critique your ideas and tell you what they think.
- 
- **GREEN, RED, BLUE** or black letters look best on white paper.
- Use short phrases instead of long sentences.
- Do not use different colors for each word or letter. It makes it hard to read.
- Do not draw really small or put too many drawings on your paper – Less is better!
- **HAVE FUN!!**
